

LIST (22-09-2025)						
MACHINE TYPE: TM-101						
SERIAL NUMBER: M.02540						
A.1.1. CHECKLIST - PALLET PUSHING SYSTEM TM-101						
Section	Item	Verification	Frequency			
A. KEEP - Cleanliness & Visual Inspection	1	General cleanliness of the pushing unit	Daily			
DAILY: It must not be changed.		Air gun.				
B.2.1. CHECKLIST - PALLET PUSHING SYSTEM TM-101						
Section	Item	Chains and trolleys cleaning	Frequency	Based on the amount of dirt accumulated on the chain, guides, and bearings.		
B. CLEAN - Cleaning Tasks	1	Air gun + degreaser + cleaning rags + after	Weekly			
The initially established lubrication frequency is WEEKLY.		PTFE spray lubricant (W40 or similar)	CHAINS	TROLLEY 1		
B.2.2. CHECKLIST - PALLET PUSHING SYSTEM TM-101						
Section	Item	Verify/Check deterioration	Frequency			
B. CLEAN - Clean + Check	2	Load-Bearing Guide Rails	Weekly			
WEEKLY: It must not be changed.		Tactile check: (Must be clean)	RIGHT	UPPER GUIDE		
B.2.3. CHECKLIST - PALLET PUSHING SYSTEM TM-101						
Section	Item	Verify/Check deterioration	Frequency			
B. CLEAN - Clean + Check	3	Pulleys and Chains	Weekly			
WEEKLY: It must not be changed.		Tactile check: (Must be clean)	CHAINS	TROLLEY 1-2		
B.2.4. CHECKLIST - PALLET PUSHING SYSTEM TM-101						
Section	Item	Verify/Check deterioration	Frequency			
B. CLEAN - Cleaning + Check	4	Bearings and Trolleys axles	Weekly			
WEEKLY: It must not be changed.		Tactile check: (Must be clean)	BEARINGS	TROLLEY 1		
B.2.5. CHECKLIST - PALLET PUSHING SYSTEM TM-101						
Section	Item	Verify/Check deterioration	Frequency			
B. CLEAN - Clean + Check	5	Trolleys Plaques for Teeths	Weekly			
WEEKLY: It must not be changed.		Tactile check: (Must be clean)	RIGHT PLAQUE	TROLLEY 1		
C.2.6. CHECKLIST - PALLET PUSHING SYSTEM TM-101						
Section	Item	Manual verification and condition assessment	Frequency			
C. CHECK	6	Anti -Lift Device molds	Weekly			
WEEKLY: It must not be changed.		Tactile check: (Must be clean)		DUROGLIS		
D.2.7. CHECKLIST - PALLET PUSHING SYSTEM TM-101						
Section	Item	Identification of trolley lubrication points	Frequency	Based on the consumption rate of grease applied to axles and bearings .		
D. LUBRICATION	7	Trolleys Grease Fittings	Weekly			
The initially established lubrication frequency is WEEKLY.			GREASE	FITTING 1		

<u>E.2.8. CHECKLIST - PALLET PUSHING SYSTEM TM-101</u>						
Section	Item	Identification of molds lubrication points.	Frequency	Based on the incidences that the nozzles have in that application		
E. LUBRICATION	8	Lubrication System for Mold Guides	Weekly			
The initially established lubrication frequency is WEEKLY.			OIL	NOZZLE 1		

<u>M.3.1. CHECKLIST - PALLET PUSHING SYSTEM TM-101</u>						
Section	Item	Verify/Check measurements	Frequency	Based on the progression of slack created in the joints or the stretching of the chain.		
D. SPECIAL CHECK - Measurements & Tracking	1	Chain elongation measurement	Monthly			
The initially established measure frequency is MONTHLY.		Measure with a large analog or digital calliper.		TROLLEY 1		

<u>M.3.2. CHECKLIST - PALLET PUSHING SYSTEM TM-101</u>						
Section	Item	Verify/Check measurements	Frequency	Based on the progression of slack created in the joints or the stretching of the chain.		
D. SPECIAL CHECK - Measurements & Tracking	2	Chain tension in tensioning links	Monthly			
The initially established measure frequency is MONTHLY.		Measure with a large analog or digital calliper.		WASHERS		

<u>M.3.3. CHECKLIST - PALLET PUSHING SYSTEM TM-101</u>						
Section	Item	Verify/Check measurements	Frequency	Based on the polycord wear progression		
D. SPECIAL CHECK - Measurements & Tracking	3	Polycord wear (Trolleys 1-9)	Monthly			
The initially established measure frequency is MONTHLY.		Measure with a small analog or digital calliper.		POLICORD 1
