

D.2.7. CHECKLIST - PALLET PUSHING SYSTEM TM-101

- Equipment: M.02540
- Frequency: Weekly
- Inspector:
- Date: //

Main Checklist Table:

Section	Item	Identification of trolley lubrication points	Frequency		✓ Complies	✗ Fails	Observations/Measurement
D. LUBRICATING	7	Trolleys Grease Fittings	Weekly				
			GREASE	FITTING 1			
				FITTING 2			
				FITTING 3			
				FITTING 4			
				FITTING 5			
				FITTING 6			

The initially established lubrication frequency is WEEKLY.
However, this periodicity must be considered an initial baseline and is subject to continuous review.

Grease must flow smoothly from until clean grease appears (flushes out old/degraded grease).

No excess grease should accumulate (wipe off surplus to avoid dust buildup).

Observations & Corrective Actions:
