

M.3.1. CHECKLIST - PALLET PUSHING SYSTEM TM-101

• Equipment: M.02540

• Frequency: Monthly

• Inspector: _____

• Date: // _____

Main Checklist Table:

Section	Item	Verify/Check measurements	Frequency		✓ Complies	✗ Fails	Observations/Measurement
M. SPECIAL CHECK - Measurements & Track	1	Chain elongation measurement Measure with a large analog or digital calliper.	Monthly				Link to register

To ensure consistency and accuracy in all measurements, always measure the distance between the two trolleys using the same fixed reference point as the origin. "BENCHMARK".

Measure between the push fingers of trolleys 2 and 3.

	DATE :								
TROLLEYS	1 / 2	2 / 3	3 / 4	4 / 5	5 / 6	6 / 7	7 / 8	8 / 9	9 / 1
MEASURE L.									
MEASURE R.									

When chain elongation reaches 424 / 425 mm the chain has reached its end of service life and must be replaced.

TROLLEY 1				
TROLLEY 2				
TROLLEY 3				
TROLLEY 4				
TROLLEY 5				
TROLLEY 6				
TROLLEY 7				
TROLLEY 8				
TROLLEY 9				

Observations & Corrective Actions:
