

TOOLS USED FOR TESTING & MEASUREMENTS:

The following measuring tools are used for all measuring checks on the fresh and cured tiles during the Production Process and the Quality Control of the Concrete tiles.

A)

To measure: fresh and cured tiles thicknesses.

1 Small digital caliber 150 mm

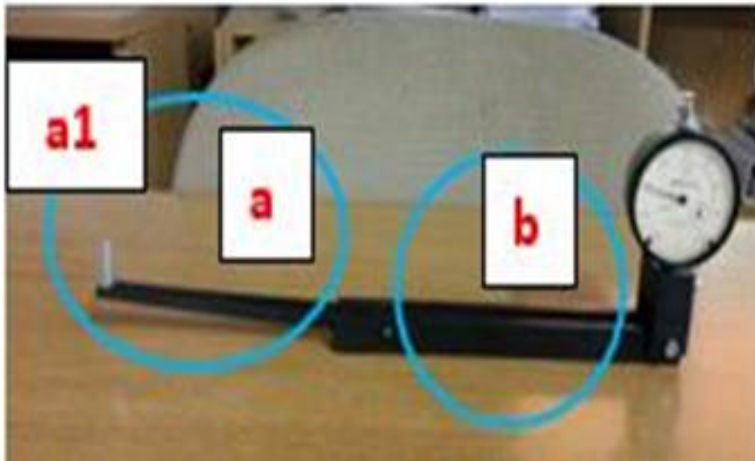

1 Small digital depth caliber 150 mm

B)

To measure: big and small rollers & slippers heights and identify the inclinations of the slippers to extrusion head

1 Digital Comparator

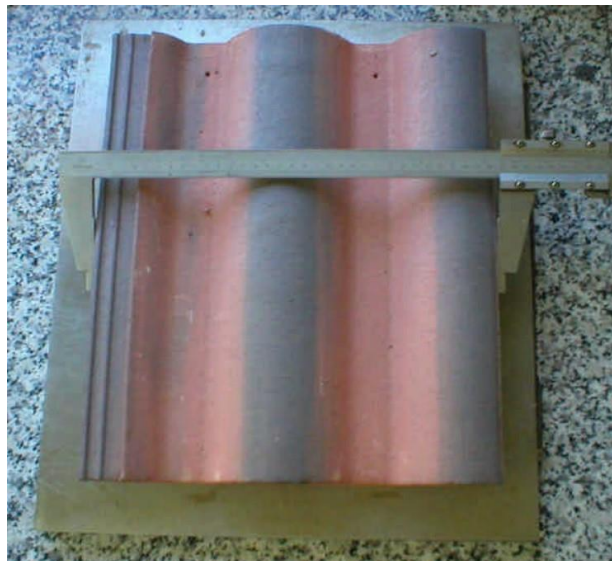

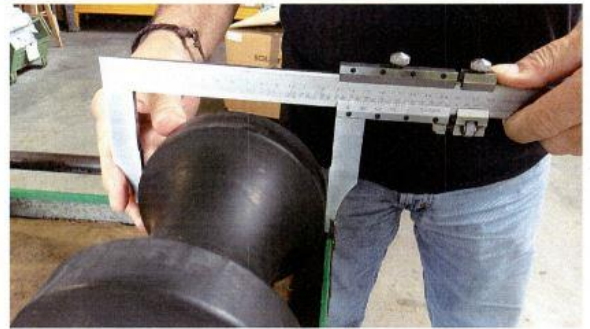

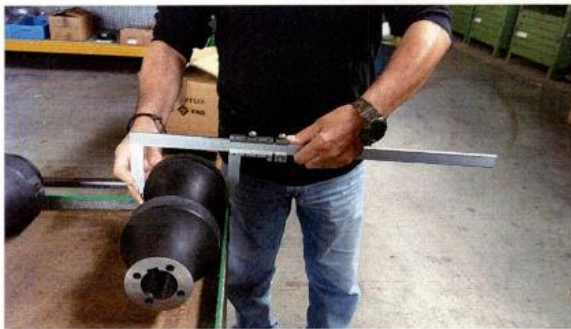

C)

To measure: tiles (lengths and widths), rollers and slippers (diameters, lengths and widths)

1 Digital caliber 500 mm

CHECK THE WEAR OF ROLLER WIDER DIAMETERS

D)

To measure: dry tiles thicknesses.

1 Small digital micrometer
